

MOAZ WASIM

Laravel Developer | Backend Systems Architect | API & E-Commerce Specialist

(+92) 308-6287520
moazewasim0@gmail.com

PROFESSIONAL SUMMARY:

- Laravel developer with 2.5+ years of experience in backend web development, specializing in Laravel, RESTful APIs, and custom business logic.
- Built and maintained platforms across e-commerce, crypto trading, PDF tools, hostel management, and learning systems.
- Skilled in deploying Laravel applications on Hostinger hPanel, cPanel, and shared hosting, with full control over .env setup, cron jobs, permissions, SSL, and domain mapping.
- Experienced in customizing pre-built Laravel applications from marketplaces by refactoring, extending features, fixing bugs, and optimizing performance.
- Strong in MySQL performance tuning, secure authentication, payment gateway integrations, and role-based access control.
- Effective at debugging production issues, optimizing APIs, and delivering clean, scalable code for real-world needs.

TECH STACK / SKILLS:

- Language: PHP
- Frameworks: Laravel, RESTful APIs
- Databases: MySQL (indexes, query profiling, relational design)
- Frontend: HTML5, CSS3, Bootstrap, Blade templating
- Tools: Git, GitHub, Composer, Postman, Stripe

- | | |
|--|------------------------------|
| ✓ Front-end & back-end web development | ✓ Agile software development |
| ✓ Code structure & architecture | ✓ Test driven development |
| ✓ Web performance optimization | ✓ Source control |

PROFESSIONAL EXPERIENCE:

Vonix Soft — Project Manager

Laravel Developer | July 2024 - Present

- Built scalable multi-role systems with admin-panel-based control and modular features.
- Integrated Stripe, NowPayment, and Metamask payment gateways for subscription and investment systems.
- Created cron-based automation for expiring tickets, cleaning old data, and triggering payout calculations.
- Fixed major production bugs in cron task failures, incorrect balance updates, and broken referral trees.

Code Debuggers — Laravel Developer

Laravel Developer | May 2024 - July 2024

- Developed RESTful APIs for a tutor-student-admin learning platform, using Stripe Connect for tutor payouts.
- Implemented secure multi-auth system and real-time status updates.
- Fixed bugs in token duplication, username/email login conflicts, and quantity mismatch in cart APIs.
- Collaborated with Flutter developers to align backend logic with mobile UI components.

Future Forward Technology — PHP Developer

PHP Developer | May 2023 - May 2024

- Led backend development of a School Management System and POS software with attendance, billing, and reporting modules.
- Migrated legacy PHP logic into modern Laravel-based architecture.
- Developed RFID-based attendance tracking, auto-promotion, fee installment handling, and student reports.
- Frequently customized marketplace scripts for production use — cleaned bloatware, refactored controllers, and patched licensing bugs.

HIGHLIGHTED PROJECTS & CONTRIBUTIONS

nhapk.org – National Hostel Association of Pakistan (NHAP)

- A national-level hostel registration and management platform developed for NHAP to streamline private hostel records, association memberships, and documentation workflows.
- Built with Laravel, the system includes multi-step hostel registration, document verification, PDF certificate generation, and admin review dashboards.
- This is role based system with different domains connected with 1 database includes major roles like police station, Hostel Owners, Hostellites, Hostel Working staff etc.
- Implemented optimized data filtering, role management, and exportable reports.

bullcryptosignals.com - Bull Crypto Signals

- Laravel platform for managing and tracking cryptocurrency trading signals.
- Built logic to track entry price, stop loss, and multi-target strategy (target_1, 2, 3) using live CoinCap API.
- Added real-time target update system with fallbacks. Fixed logic where targets were not being marked correctly due to float precision mismatch.

Inventory Management Systems, Restaurant Management Systems

- Works on several inventory management and restaurant management systems some the highlights are **thekebabishpizza.com** which is a **SAAS** based restaurant management system with multi role full customizations.
- **protechcomputers.pk** is a inventory management system in which all the inventory and accounts records are managed with user balance sheet and all transaction records

PDF tool SAAS

- Built a Laravel-based PDF toolset to merge, split, compress, and convert PDFs, using JS only and custom integrations.
- Developed installer wizard for self-hosted clients: checks server compatibility, .env setup, and database seeding.
- Fixed .env file write errors on shared hosting via fallback logic with permission checks and file locking.
- This is a complete script made for a client to upload on codecanyon.

MLM Systems and other Laravel paid scripts

- Worked on seprate Laravel paid scripts from codecanyon and other platforms to debug them extend functionality and add features and other automations in them.
- One recent project is a custom clone of **PI** app made in Laravel Which has admin panel only and apis for mobile app you can check it on **gnetwork.pro**

EDUCATION:

2020 - 2024 | Islamia University Of Bahawalpur
Bachelor of Computer Science - BSCS
